

Reverse Transfer at CSU-Global

CSU-Global has initiated its work to facilitate the reverse transfer of credits for its students that have some Colorado community college credit but not an Associate's degree. The University initiated its participation in April 2014 as prompted by the CDHE initiative Degree Within Reach. As of May 5, 19 of 47 CSU-Global students, who earned enough CSU-Global credit to qualify for their Associate's degree through reverse transfer, consented to the release of their transcripts to the Colorado Community College System for their degree awards. CSU-Global will continue to actively promote and extend the opportunity to its students in FY15.
